

### REMARKS

Applicant has carefully considered the matters raised by the Examiner in the outstanding Office Action but remains of the position that patentable subject matter is present. Applicant respectfully requests reconsideration of the Examiner's position based on the amendments to the claims and the following remarks.

Claims 1-3, 5-11, 13, 15 and 19 had been rejected as being anticipated by Tucker. Claims 19 and 22 had been rejected as being anticipated by Aharoni. Claims 19 and 21-23 had been rejected as being anticipated by Marechal. Finally, claims 16 and 18 had been rejected as being unpatentable over Tucker.

In the Examiner's Comments Section on page 7 of the Office Action, the Examiner had suggested amended claim language in order to overcome the above rejections. Applicant appreciates these suggestions and has adopted the majority of this language.

Claim 1 has been amended to recite that the layer is formed on "the most image side-entire surface" of the lens. Claims 19 and 21-23 have been amended to delete the wording "at least one of" referring to the wavelength regions.

Applicant, however, has not limited the preamble of claim 1 to "eyeglasses" as suggested by the Examiner. The present invention includes a sensor or a CCD in addition to an eyeglass lens (page 17, lines 18-21). Thus, Applicant has not limited claim 1 to an eyeglass lens.

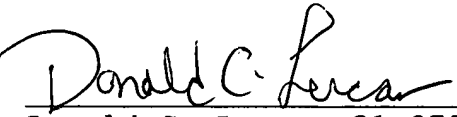

Applicant has also amended claims 1 and 19 to correct minor typographical errors. Specifically, the word "region" has been added to claim 1 and the word "and" has been deleted from claim 19.

In view of the foregoing, it is respectfully submitted that the application is in condition for allowance and such action is respectfully requested. Should any extensions of time or fees be necessary in order to maintain this Application in pending condition, appropriate requests are

hereby made and authorization is given to debit Account #  
02-2275.

Respectfully submitted,

MUSERLIAN, LUCAS AND MERCANTI, LLP
